

**CODERUNNERS
PRESENTS:**

HEARTBEAT

INTRODUCTION

Covid-19, a severe pandemic, has flooded hospitals, leaving them understaffed, and with its high contagiousness, patients are reluctant to visit hospitals and other medical clinics.

We saw many post covid cardiac complains, to overcome this problem, our team has come up with an innovative solution with our project Heartbeat.

SITE MAP

User sign in

Heart disease predictor

Virtual meet with highly qualified doctors.

Heartbeat Pharmacy

Know your heart

HEART DISEASE PREDICTOR

Our heart disease predictor will take inputs from the user regarding their medical history and their symptoms through questions.

Our Machine Learning model would predict the probability for heart disease using pre-existing data based on BMI, smoking, alcohol consumption etc.

VIRTUAL MEET WITH DOCTORS

This section of the website will enable you to connect with doctors and discuss your issues.

This section would further be divided into various sub categories in which you can choose a specific specialist to talk to.

Upon choosing the doctor, you would be required to give your contact information, where an appointment scheduled by our team would be sent ASAP.

KNOW YOUR HEART

- This section of our website provides information about all heart diseases along with their symptoms, preventions and treatments

HEARTBEAT PHARMACY

- Prescribed medicines will automatically be added to the user's cart, where the user can add or remove any medicines as per your need.
- General medicines can be ordered without any prescription, with a wide range of healthcare products.
